

GSCCC Stakeholder Meeting Highlights
September 30, 2014

Twenty-two attended the meeting, which was held at DES offices in Concord.

Tom Murray, president of Pugliese Contracting in Windham presented on his company's alternative energy initiatives. The company's fleet of propane vehicles saves money on fuel and the alternative fuel is easier on engines, stretching the time between oil changes. Tom brought his propane truck, a propane concrete cutter and Dingo (upfit to run on propane).

Wes Hansen of Nuvera Fuel Cells presented on hydrogen technology and what the future looks like for hydrogen vehicles and infrastructure.

Dolores Rebolledo, GSCCC Coordinator, briefed the group on recent outreach events and discussed upcoming events (including AltWheels on October 20th). Meeting adjourned at 11:20 and the group went to the visitor parking lot to check out the propane vehicle and equipment.
